

MADAMSHETTY KALYAN KUMAR

Full stack Developer

CAREER GOALS

As a full stack developer , my career goals are should be in depth well-versed with technologies(front end + back end) get expertise with more web applications and get worked with more development teams.

TECHNICAL SKILLS

- **programming languages** : Java , Python
- **web development** : Html , Css , JS, Bootstrap
- **Frontend technologies** : Angular JS
- **Backend technologies** : SpringMvc , SpringBoot
- **Databases** : MySQL
- **Data Science** : Data analytics , Deep Learning(Basics)

EMPLOYMENT HISTORY

Virtusa - Hyderabad

ASSOCIATE ENGINEER- TECHNOLOGY , 2020-PRESENT

Currently working as a full stack developer and get equipped with the various stack technologies , working with various development teams and getting more insights on the tech stack.

OpenText - Bangalore

INTERN, 2019-2020

- *Understanding the software development process from design to release in an*
- *Agile Development Framework.*
- *Conducting manual testing on the assigned component of a product.*
- *Developing automation test cases and fixing the issues encountered during the*
- *phase.*
- *Understanding the Documentum API and working with the upgrades on*
- *Documentum content server.*
- *Working on VM migration and data integrity areas.*

ACADEMIC HISTORY

CMR College of Engineering and Technology

BACHELOR OF TECHNOLOGY

Graduated in computer Science Engineering with distinction 2016-2020

Senior Secondary Education

SV Trishool Junior College

Mpc (2014-2016)

Secondary School

Krishnaveni talent School

2014

Projects

Hospital Management System

Hospital Management System(HMS) is a system for managing the hospital functions and events. It has different modules such as adding new doctors, managing parents and managing appointments. It is a web-based powerful hospital management containing user and admin panel. The Web Application is built using SpringBoot and Angular Js.

Browser Automation

Browser automation tools can automate Web browser to perform repetitive and error prone tasks. Selenium tool is used for scripts and chrome for the browser. DOM elements have been captured for the process flow. User interface is deployed using Jsp servlets. Expected results are automating process till the destination reached.

AWARDS & CERTIFICATIONS

- Oracle Certified Java SE 8 Programmer
- Data Analytics
- Deep Learning
- Vorten tech solutions(IOT)

Online Application for Placements

This mini project is built using the ServiceNow platform. It provides the direct interaction between students and recruiters in order to meet the gap between them. User Interface is deployed using inbuilt components from the platform. Workflows have been used for the automation of the process and capturing events.

Interests & Additional Info

- *Passionate in dealing with the numbers.*
- *Tech Enthusiast*
- *Organised technical events during the college fests*
- *Active participation in NSS camps*
- *Active participation in blood donation camps*
